

Checklist

My medical tests and results

What is the test for?

Do I need to book it myself or will you organise it?

Do I need to do anything to prepare for the test – for example, avoid eating or drinking? Will this affect any medication I'm taking?

How and when will I get the results?

Who do I contact if I don't get the results?

When you've been given the results

Can I have a copy of my test results?

Can you explain what these results mean?

Do I need any follow-up tests or appointments?

If yes, will you book these for me or do I need to book them?
